Can you and your child spot some of the "hot spots" where germs can hide at home? Walk from room to room, and see how many surfaces your child can identify where cold and flu germs can hide.

Check each one off, then tally your results, sign it and return this worksheet to your child's teacher. (And now that you know where germs can hide, don't forget to DISINFECT with an appropriate EPA-registered disinfectant\*!)

## Meet the Clean Club

We developed these grime fighters to help teach kids healthy hygiene habits. By reinforcing these lessons, we can all help reduce the spread of germs in school and at home.

## Pitch in!

Donate Clorox® Disinfecting Wipes to your child's school.\* They kill 99.9% of germs, on hard, nonporous surfaces, that can cause colds and flu.†

\*Check school policy to confirm use and donation of products is acceptable. Adults must deliver any donations themselves; do not give products to children. Store and keep out of the reach of children. Use as directed on hard, nonporous surfaces.

†See product label for usage instructions, including which surfaces product is approved for use on.
